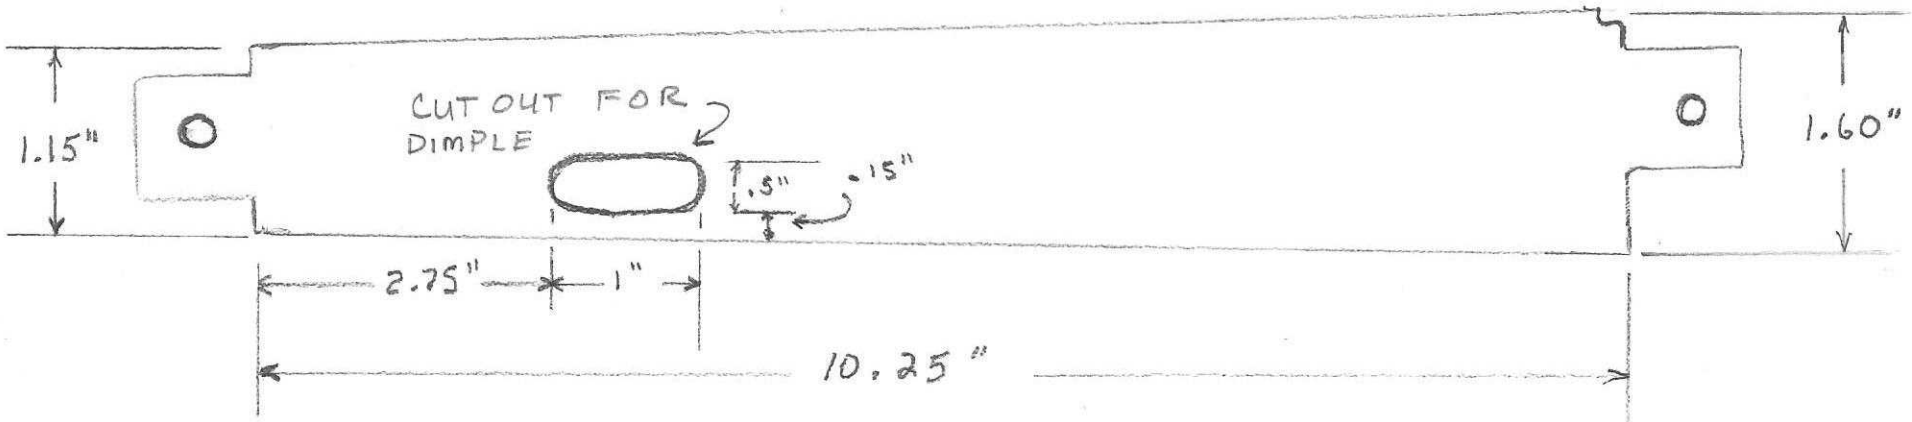
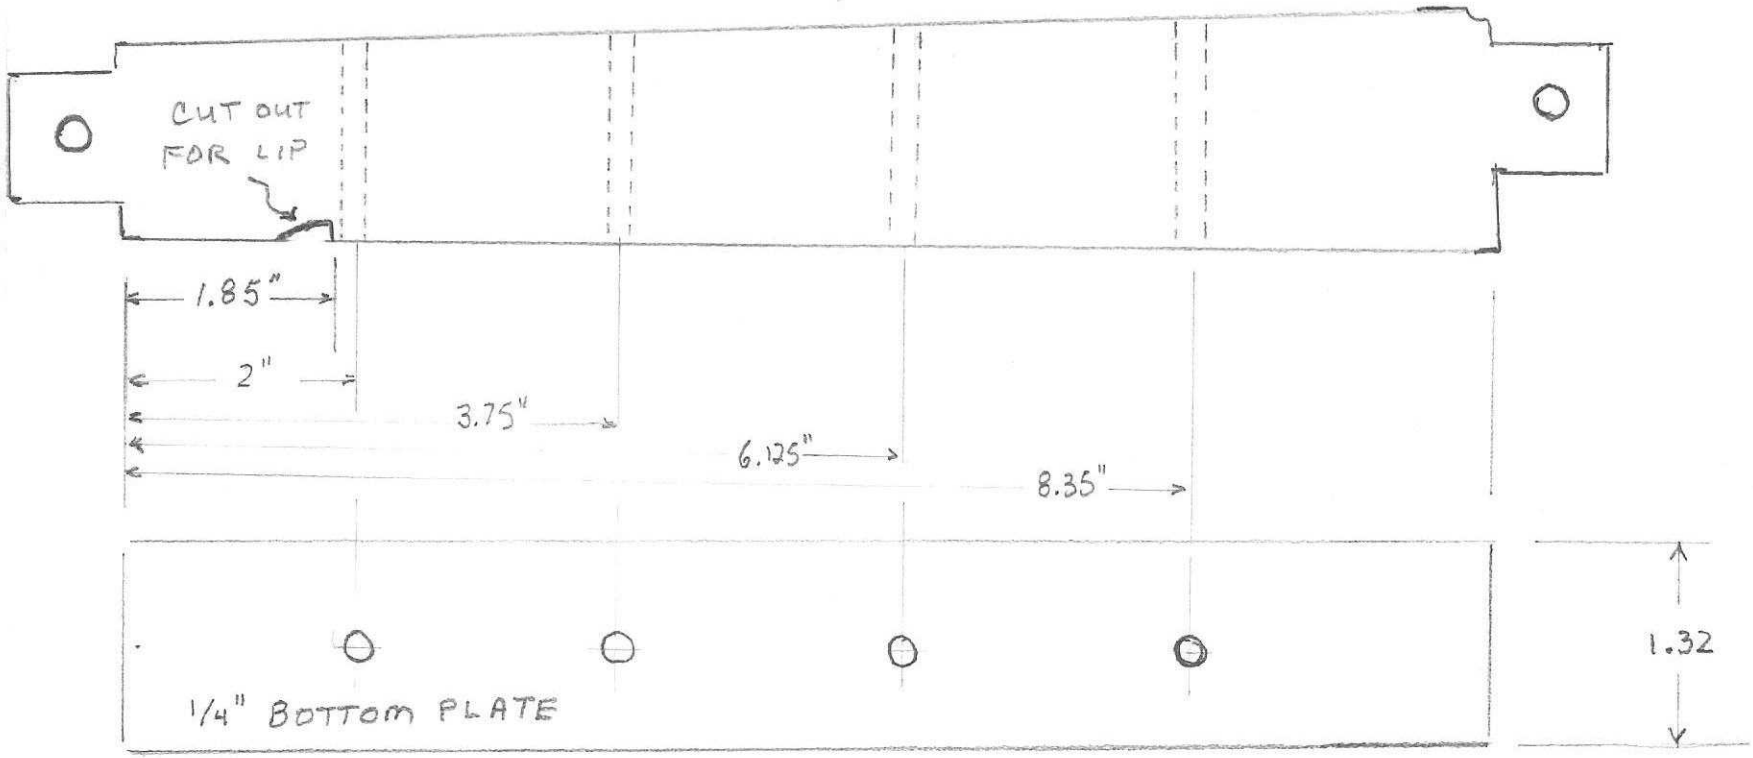
JIG "BLOCK"
555th

2 - SIDE PLATES 1/4"



2 - CENTER PLATES 3/8" or 1 - 3/4" C. PLATE



Hello All here are the diagrams.... If any one have a conversion program to turn these in to a TIF file please send it to me I have had a couple of requests, or if you know of a plug-in for auto cad that will do it, that would be cool. If you cant open them let me know what CAD format you need.

Remember send these out to every one and every where.... the days of the $500 jig are over

Shaun Kelly
Eielson AFB Alaska

I can convert these to dwg, dwf, dws, dwt. If there is a need let me know.....

P.S.
These are "CopyLeft" It is the opposite of Copyright. You may reproduce as much as you like but you may not charge for them. They are to remain FREE. If you add any improvements to the design be sure to give all parties there due credit.

Happy building
