List of Tables xxv

List of Example Calculations xxvii

Preface xxix

Chapter 1. Military Explosives

Section I. Demolition Materials

1-1. Characteristics 1-1

1-2. Selection of Explosives 1-1

1-3. Domestic Explosives 1-1

Ammonium Nitrate 1-1
Pentaerythrite Tetranitrate (PETN) 1-1
Cyclotrimethlenetrinitramine (RDX) 1-2
Trinitrotoluene 1-3
Tetryl 1-3
Nitroglycerin 1-3

DISTRIBUTION RESTRICTION: Distribution authorized to U.S. Government agencies only to protect technical or operational information from automatic dissemination under the International Exchange Program or by other means. This determination was made on 15 February 1991. Other requests for this document will be referred to Commandant, U.S. Army Engineer School, ATTN: ATSE-TDM-P, Fort Leonard Wood, MO 65473-6650.

DESTRUCTION NOTICE: Destroy by any method that will prevent disclosure of contents or reconstruction of the document.

---

* This publication supersedes FM 5-25, 10 March 1986.

Black Powder 1-3
Amatol 1-3
Composition A3 1-3
Composition B 1-3
Composition B4 1-3
Composition C4 (C4) 1-3
Tetrytol 1-3
Pentolite 1-3
Dynamites 1-4
1-4. Foreign Explosives 1-4
Composition 1-4
Use 1-4

Section II. Service Demolition Charges

1-5. Block Demolition Charges 1-4
1-6. TNT Block Demolition Charge 1-5
Characteristics 1-5
Use 1-5
Advantages 1-5
Limitations 1-5
1-7. M112 Block Demolition Charge 1-6
Characteristics 1-6
Use 1-6
Advantages 1-6
Limitations 1-6
1-8. M118 Block Demolition Charge 1-6
Characteristics 1-6
Use 1-6
Advantages 1-7
Limitations 1-7
1-9. M186 Roll Demolition Charge 1-7
Characteristics 1-7
Use 1-7

Page

Advantages 1-7
Limitations 1-7
1-10. Forty-Pound, Ammonium-Nitrate Block Demolition Charge 1-7
Characteristics 1-7
Use 1-8
Advantages 1-8
Limitations 1-8
1-11. M1 Military Dynamite 1-8
Characteristics 1-8
Use 1-8
Advantages 1-8
Limitations 1-8

Section III. Special Demolition Charges and Assemblies

1-12. Shaped Demolition Charge 1-9
Characteristics 1-9
Use 1-10
Special Precautions 1-10
1-13. M183 Demolition Charge Assembly 1-11
Characteristics 1-11
Use 1-11
Detonation 1-11
1-14. M1A2 Bangalore-Torpedo Demolition Kit 1-11
Characteristics 1-11
Use 1-12
Assembly 1-12
Detonation 1-12
1-15. M180 Demolition Kit (Cratering) 1-12
Characteristics 1-12
Use 1-13
Detonation 1-13

Page

Section IV. Demolition Accessories

1-16. Time Blasting Fuse 1-13
M700 Time Fuse 1-14
Safety Fuse 1-14
1-17. Detonating Cord 1-14
Characteristics 1-14
Use 1-15
Precautions 1-15
1-18. Blasting Caps 1-15
Electric Blasting Caps 1-15
Nonelectric Blasting Caps 1-16
1-19. M1A4 Priming Adapter 1-16
1-20. M8 Blasting Cap Holder 1-17
1-21. M1 Detonating-Cord Clip 1-17
Branch Lines 1-17
Splices 1-18
1-22. M1 Adhesive Paste 1-18
1-23. Pressure-Sensitive Adhesive Tape 1-18
Characteristics 1-18
Use 1-18
Limitations 1-18
1-24. Supplementary Adhesive for Demolition Charges 1-18
Characteristics 1-18
Use 1-18
1-25. Waterproof Sealing Compound 1-18
1-26. M2 Cap Crimper 1-18
1-27. M51 Blasting-Cap Test Set 1-19
Characteristics 1-19
Use 1-19
Maintenance 1-19

Page

1-28. Blasting Machines 1-20

M32 10-Cap Blasting Machine 1-20
M34 50-Cap Blasting Machine 1-20

1-29. Firing Wire and Reels 1-20

Types of Firing Wire 1-20
Reel 1-21

1-30. Firing Devices and Other Accessory Equipment 1-21

M60 Weatherproof Fuze Igniter 1-21
Demolition Equipment Set 1-21

Chapter 2. Initiating Sets, Priming, and Firing Systems

Section I. Initiating Sets

2-1. Nonelectric Initiation Sets 2-1

Components Assembly 2-1
Preparation Sequence 2-1
Fuse Initation 2-4

2-2. Electric Initiation Sets 2-5

Preparation Sequence 2-5
Components Assembly 2-5
Circuit Initiation 2-9
Splicing Electric Wires 2-9
Series Circuits 2-10

Section II. Priming Systems

2-3. Methods 2-11

2-4. Priming TNT Demolition Blocks 2-11

Nonelectric 2-11
Electric 2-12
Detonating Cord 2-13

Page

2-5. Priming M112 (C4) Demolition Blocks 2-13
Nonelectric and Electric 2-13
Detonating Cord 2-14
2-6. Priming M118 and M186 Demolition Charges 2-15
Nonelectric and Electric 2-15
Detonating Cord 2-15
2-7. Priming Dynamite 2-16
Nonelectric 2-16
Electric 2-18
Detonating Cord 2-18
2-8. Priming 40-Pound, Ammonium-Nitrate Cratering Charges 2-19
2-9. Priming M2A4 and M3A1 Shaped Charges 2-20
2-10. Priming the Bangalore Torpedo 2-21
Nonelectric 2-21
Electric 2-22
Detonating Cord 2-22

Section III. Firing Systems

2-11. Types of Firing Systems 2-23
Single 2-23
Dual 2-23
2-12. Detonating Cord 2-25
2-13. Attaching the Blasting Cap 2-25
2-14. Detonating-Cord Connections 2-25
Branch Line 2-26
Ring Main 2-26
Line Main 2-27
2-15. Initiating Lines and Mains 2-28
Line Main and Branch Line 2-28
Ring Main 2-28

Page

Chapter 3. Calculation and Placement of Charges

Section I. Demolition

3-1. Principles 3-1
Effects of Detonation 3-1
Significance of Charge Dimensions 3-1
Significance of Charge Placement 3-2
3-2. Types of Charges 3-2
Internal Charges 3-2
External Charges 3-2
3-3. Charge Calculations 3-2
Type and Strength of Materials in Targets 3-2
Size, Shape, and Configuration of Target 3-2
Desired Demolition Effect 3-2
Type of Explosive 3-2
Size and Placement of Charge 3-2
Method of Tamping 3-2
Direction of Initiation 3-3
3-4. Charge Selection and Calculation 3-3
Selection 3-3
Calculation 3-3

Section II. Normal Cutting Charges

3-5. Timber-Cutting Charges 3-4
Internal Charges 3-4
External Charges 3-5
Ring Charge 3-6
Underwater Charge 3-6
Abatis 3-6
Hasty Timber Calculations 3-7

Page

3-6. Steel-Cutting Charges 3-8

Target Factors 3-8
Explosives Factors 3-8

Section III. Special Cutting Charges

3-7. Purpose 3-12

3-8. Ribbon Charges 3-12

Charge Thickness 3-12
Charge Width 3-12
Charge Length 3-13

3-9. Saddle Charge 3-13

Dimensions 3-13
Detonation 3-14
Placement 3-14

3-10. Diamond Charge 3-14

Dimensions 3-14
Placement 3-15
Priming 3-15

Section IV. Breaching Charges

3-11. Critical Factors 3-15

3-12. Computation 3-15

Formula 3-15
Breaching Radius (R) 3-17
Material Factor (K) 3-17
Tamping Factor (C) 3-17

3-13. Breaching Reinforced Concrete 3-17

3-14. Breaching Other Materials 3-18

3-15. Number and Placement of Charges 3-19

Number of Charges 3-19
Placement 3-19

Page

3-16. Counterforce Charge 3-20
Use 3-20
Calculation 3-20
Placement 3-21
Priming 3-21

Section V. Cratering and Ditching Charges

3-17. Factors 3-21
Sizes 3-21
Explosives 3-21
Charge Confinement 3-21
3-18. Breaching Hard-Surfaced Pavements 3-21
3-19. Hasty Crater 3-22
Boreholes 3-22
Charge Size 3-22
Firing System 3-23
Tamping 3-23
3-20. Deliberate Crater 3-23
3-21. Relieved-Face Crater 3-23
3-22. Misfire Prevention 3-25
3-23. Creating Craters in Permafrost and Ice 3-25
Blasting in Permafrost 3-25
Blasting in Ice 3-25
Making Vehicle Obstacles 3-26
3-24. Craters as Culverts 3-26
3-25. Craters as Antitank Ditches 3-26
3-26. Ditching Methods 3-26
Single Line 3-26
Cross Section 3-27

Section VI. Land-Clearing Charges

3-27. Stump Removal 3-28
Taprooted Stumps 3-28
Laterally Rooted Stumps 3-28
3-28. Boulder Removal 3-28
Snake-Hole Method 3-28
Mud-Cap Method 3-29
Block-Hole Method 3-29
3-29. Springing Charge 3-29
3-30. Quarrying 3-30

Section VII. Special Applications

3-31. Survivability Positions 3-30
Depth 3-30
Spacing 3-30
Charge Size 3-31
Concealment 3-31
3-32. Equipment Destruction 3-31
Guns 3-31
Vehicles 3-32

Chapter 4. Bridge Demolition

Section I. Requirement

4-1. Purpose of Bridge Demolition 4-1
4-2. Degree of Destruction 4-1
4-3. Debris 4-1

Page

Section II. Considerations

4-4. Bridge Categories 4-2
Simply Supported 4-2
Miscellaneous 4-2
Continuous 4-2
4-5. Stages of Destruction 4-2
Minimum Conditions 4-3
Types of Collapse Mechanism 4-4
Unsuccessful Bridge Demolitions 4-4
4-6. Bottom Attack 4-5
4-7. Top Attack 4-6
4-8. Efficient Demolition Methods 4-6
4-9. Concrete-Stripping Charges 4-7
Description 4-7
Charge Calculations (Simply Supported Bridges) 4-7

Section III. Bridge Attacks

4-10. Guidelines (Continuous and Simply Supported Bridges) 4-8
Continuity 4-8
Construction Depth 4-8
Flange Thickness (Steel-Girder Bridges) 4-8
Bearing 4-8
Category Selection 4-8
Reconnaissance Procedures 4-9
4-11. Simply Suported Bridges 4-10
Categorization 4-10
Reconnaissance 4-13
Attack 4-13
Attack Methods 4-14

Page

4-12. Continuous Bridges 4-14
Categorization 4-14
Reconnaissance 4-19
Bridge Attacks 4-19
4-13. Miscellaneous Bridges 4-20
Suspension-Span Bridges 4-20
Movable Bridges 4-21

Section IV. Abutments and Intermediate Supports

4-14. Abutments 4-24
Abutments (5 Feet Thick or Less) 4-24
Abutments (Over 5 Feet Thick) 4-24
Abutments (Over 20 Feet High) 4-24
Wing Walls 4-24
4-15. Intermediate Supports 4-26
Internal Charges 4-26
External Charges 4-26

Chapter 5. Demolition Operations

Section I. Demolition Plan

5-1. Demolition Obstacles 5-1
5-2. Barriers and Denial Operations 5-1
5-3. Demolition Planning 5-1

Section II. Types of Military Demolitions

5-4. Demolition Orders 5-2
5-5. Preliminary Demolitions 5-2
Purpose 5-2

Page

Advantages 5-2
Progressive Preparation 5-2
5-6. Reserved Demolitions 5-2
Purpose 5-2
Considerations 5-2
States of Readiness 5-3
Responsibilities 5-3
Command and Control of Reserved Demolitions 5-4

Section III. Demolition Reconnaissance

5-7. Reconnaissance Orders 5-5
5-8. Reconnaissance Record 5-6
Purpose 5-6
Information Required 5-6

Section IV. Obstacle Folder

5-9. Purpose 5-6
5-10. Language 5-6
5-11. Contents 5-7
5-12. Special Instructions 5-7

Chapter 6. Demolition Safety

Section I. General Safety

6-1. Considerations 6-1
6-2. Explosive Materials 6-1
Blasting Caps 6-1
Time Fuse and Detonating Cord 6-3
Plastic and Sheet Explosives 6-3

Page

Picric Acid 6-3
Commercial Explosives 6-3
6-3. Boreholes 6-4
6-4. Toxicity 6-4
6-5. Natural and Physical Properties 6-4
Lightning 6-4
Static Electricity 6-4
Induced Currents 6-4
Blast Effects 6-4
Missile Hazards 6-5
6-6. Underwater Operations 6-5
Explosives 6-5
Nonelectric Caps 6-5
Time Fuse 6-5
Detonating Cord 6-5
M60 Fuze Igniter 6-6
6-7. Safe Distances 6-6

Section II. Misfire Procedures

6-8. Nonelectric Misfires 6-8
Causes 6-8
Prevention 6-8
Clearing Procedure 6-8
6-9. Electric Misfires 6-9
Causes 6-9
Prevention 6-9
Clearing Procedure 6-9
6-10. Detonating-Cord Misfires 6-10
Detonating Cord 6-10
Detonating-Cord Priming 6-10

Page

Section III. Transportation and Storage Safety

6-11. Transportation 6-10
Regulations 6-10
Safety Procedures 6-10
6-12. Storage Safety 6-12
Magazines 6-12
Temporary Storage 6-12

Section IV. Destruction of Military Explosives

6-13. Concept 6-13
6-14. Site Selection 6-13
6-15. Methods 6-13
Burning 6-13
Detonation 6-13

Appendix A. Example Calculations

A-1. Application A-1
A-2. Charge Calculations A-1
A-3. Demolition Calculation A-10
A-4. Attack Calculations A-12

Appendix B. Metric Charge Calculations

B-1. Equivalent Metric Weights for Standard Explosives B-1
B-2. Timber-Cutting Formulas B-1
Tamped Internal Charges B-2
Untamped External Charges B-2
Abatis Charges B-2

Page

B-3. Steel-Cutting Formulas B-2

Structural Steel B-2
Other Steel B-2

B-4. Pressure Charges for T-Beams B-3

B-5. Breaching Charges B-3

Breaching Radius B-3
Material Factor B-3
Tamping Factor B-4

Appendix C. Use of Demolition Charges

C-1. Sources C-1

Primary Charges C-1
Supplementary Charges C-1

C-2. Land Mines C-1

Safety Precautions C-1
Charges C-1
Priming C-1

C-3. Aerial Bombs C-1

Safety Precautions C-1
Charges C-3
Priming C-3

C-4. Artillery Shells (Nonnuclear) C-3

Safety Precautions C-3
Charges C-3
Priming C-3

C-5. Foreign Explosives C-4

Safety Precautions C-4
Priming C-4

Appendix D. Expedient Demolitions

D-1. Expedient Techniques D-1

Page

D-2. Shaped Charges D-1

Description D-1
Fabrication D-1

D-3. Platter Charge D-2

Charge Size D-2
Fabrication D-2

D-4. Grapeshot Charge D-2

Charge Size D-3
Fabrication D-3

D-5. Dust Initiator D-3

Charge Computations D-3
Fabrication D-4
Detonation D-4

D-6. Improvised Cratering Charge D-4

D-7. Improvised Borehole Method (Detonating-Cord Wick) D-4

D-8. Ammonium-Nitrate Satchel Charge D-5

Preparation D-5
Use D-5

D-9. Expedient Flame Fougasse D-5

Preparation D-6
Function D-7

Appendix E. Power Requirements for Series Firing Circuits

E-1. Series Circuits E-1

E-2. Ohm's Law E-1

E-3. Electric Power Formula E-1

E-4. Electric Blasting Caps E-1

E-5. Circuit Resistance E-1

Page

E-6. Series Circuit Calculations E-2

Current E-2
Resistance E-2
Voltage E-2
Power E-2
Example E-2

E-7. Voltage Drop E-3

E-8. Blasting Machines E-3

Determining Circuit Capacity E-3
Example E-4

E-9. Batteries and Dry Cells E-4

Appendix F. Instructions for Completing Demolitions-Related Report

F-1. AE Form 1350 . . . . . .F-1

F-2. Instructions for DA Form 2203-R F-1

F-3. Instructions for Sketches F-2

F-4. Obstacle Folder F-3

Appendix G. Explosives Identification

G-1. Purpose G-1

G-2. Demolition Materials (By Item) G-1

G-3. Demolition Materials (By DODIC) G-5

Appendix H. Methods of Attacking Bridges with Demolitions

Methods of Attack H-1
